CT300

Frame with EMV for Lenovo Thinkpad 10
CTG2F006

Warning

CT300 Smart Frames use Bluetooth connectivity to enable software control.

To ensure proper Bluetooth pairing of tablets and frames, install CT300 frames one at a time.

- If a frame is paired to an incorrect device, the connection must be removed from that device's Bluetooth settings, and it may be necessary to uninstall and reinstall the InVue Undock Application.
- If replacing a frame for a tablet which has been previously paired with another frame or had the InVue Undock Application installed, the connection must be removed from the tablet's Bluetooth settings.

1. Remove caution sticker from the back of the handle half of frame and discard. Rotate the swivel handle until it is in the position shown below. The swivel handle will detent into place when positioned properly.

2. Tighten quick release fastener (finger tight). Flip ring down flush with surface.

Select Audible/ Silent Alarm Mode:

Note: Default is audible alarm.

3. Place handle half of frame on stand.

4. LED indicates current alarm mode. If current alarm mode is desirec, skip to Software Controlled Undock.

5. Push and hold frame button for approximately 5 seconds. You will see LED change colors and tone will sound multiple times to indicate change of mode.

Software Controlled Undock

If using only IR key, proceed to step 6.

If using InVue CT300 Undock Application, download it from the Windows Store now. Follow in app instructions for setup.

If using InVue's software development kit, follow your IT department's guidelines for setup.

Frame Assembly:

6 Remove and discard the USB port cover from the tablet.

Frame Assembly:

7 Locate the USB and power connectors. Plug the USB connector into USB port and plug power connector into power port.

8 Use Software Control or IR Key to remove frame half from stand.

9 Unscrew quick release fastener and gently pull to clear area for tablet installation.

Fastener is captured in frame, do not attempt to completely remove.

10 Slide tablet into frame. Make sure connectors in tablet seat properly.

11 Slide frame halves together.

12 Secure frame halves together from rear with single quick release fastener (finger tight). Flip ring down flush with surface.

13 Slide EMV into holder.

Optional

Using a Phillips 1 screwdriver, secure EMV to holder with M2 screw provided.

Fold back EMV when not in use.

Optional Connector Storage

If tablet is removed from frame, there are optional storage slots for the USB and power connectors in the frame.
