

## SECURE DISPLAY MERCHANDISING

# SYSTEM KEY

## Store-unique key codes= reduced theft + increased profit.

All Alarming Alpha PODs incorporate patented Infrared (IR) Technology to provide maximum security. Store-unique key codes and Key Fobs that are programmed to "time out" ensure your merchandise has the protection of the safest system available on the market today.

### MAXIMUM SECURITY

- + Patented Infrared (IR) Technology
- + System integrity is tamper proof and cannot be compromised by learning remotes
- + Alarm is isolated only to the unit tampered with, not the entire system
- + Security code is specific to each store location
- + Extra measure of security with barrel key lock out
- + IR Key Fob is programmed to "time-out"—"refreshing" key code takes only seconds

programming station  
AF4401

key fob  
AF4400

power supply  
(not shown)

The system key, defined as a programming station, key fob, and power supply, is the heart of the Alpha PODs line. Each store using Alarming Alpha PODs must house a system key.

**POWER UP YOUR DISPLAY MERCHANDISE** with Alpha PODs. Available in a variety of sizes and mounts to create engaging displays that sell!
