Multi Lens Single Sensor
DNER50

1 Wipe lens with alcohol wipe provided. **Let it dry completely.**

2a Remove film from both adhesives on sensor. Wrap sensor around flat surface on lens. Press firmly for 10 seconds.

2b Confirm plunger is completely depressed against lens. Do not place sensor across rotating parts.

3 Plug sensor cord into Series 2800 Box, Extender Cable or Zips! 2.0 Alarm Unit.

4 **Optional:** If using multi lens stand (DNES50), plug sensor into back of stand.

5 **To remove sensor:** Use key fob and press down to release sensor.
