

A NO COMPROMISE SECURITY TAG

Vitag i40

1. High Detection Electronics

High detection components that improves the read range of most exit systems.

2. Ink Inside

Embedded ink canisters offer maximum deterrence and tamper resistance.

3. Pin

We increased the pin head size to 40mm, triple the size of normal pins. This transparent oversized pin head reduces tag attack and garment tearing by shoplifters. The pin is smooth and will not damage threads like grooved pins do. No need to tag garments through seams. Faster application and removal. Attach tags in a visible position.

4. Pin Park

No need to separate the tag and pin when in storage. We provide a special hole to temporarily park the pin on the tag when it is not on a garment. Faster reapplication, no lost pins and no fingers being pierced. Pin parking ensure no pins are left on sold garments that can injure your customers.

5. RFID Compatible

RFID Compatible when used with our optional RFID pin. EAS security and RFID in one tag. Future proof tag - RFID ready.

6. Lanyard Compatible

We built a cable lanyard slot that allows you to attach this tag to other merchandise like handbags, shoes and appliances.

Size

Vitag i40 is 40mm long and 40mm high. The most feature rich tag ever in a small compact body.

Colour

Black and light Grey
