

## Series 950

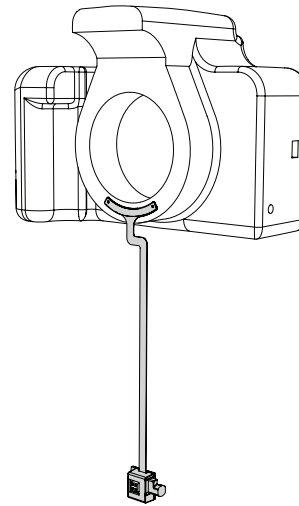

Camera Lens Sensor  
EC95229

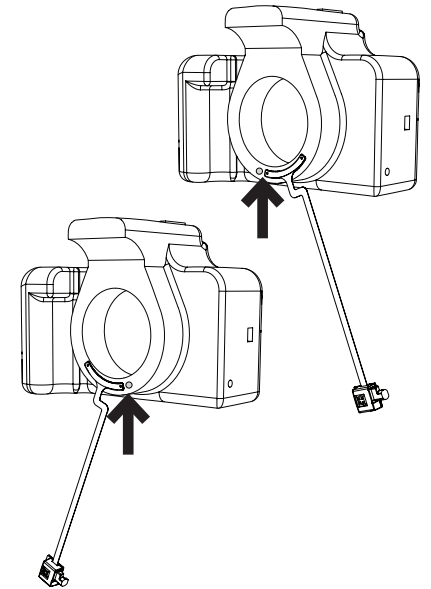

- 1 Remove camera lens from body of camera. Wipe camera body with alcohol wipe provided. **Let it dry completely.**

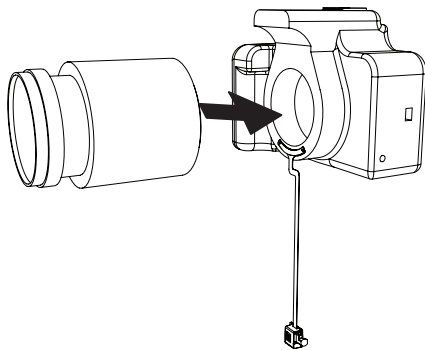

- 2a Remove film from sensor and press sensor firmly onto camera body as illustrated below.

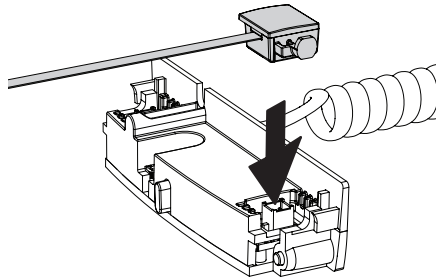

- 2b Confirm lens sensor does not cover lens release button.

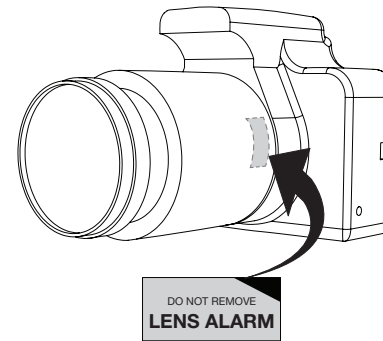

- 3 Attach camera lens to camera body.

- 4 Plug lens sensor into camera sensor. Lens sensor will only fit into right side of camera sensor. Tuck excess sensor cable into sensor unit. Do not pinch cable.

- 5 Optional: Remove film off sticker and place on lens.
