

# THIS IS NOT YOUR AVERAGE SECURITY TAG

## Vitag X30

### High Detection Electronics

High detection components that improves the read range on most exit systems.

### Hyper-Lock Security

Existing Superlock and Standard Lock magnetic detachers are unable to release the pin from this tag. The high strength lock mechanism in the X30 renders weaker detacher useless. Our Hyper-Lock detachers can open this tag and all other magnetic tags.

### Pin

We increased the pin head size to 30mm, double the size of normal pins. This transparent oversized pin head reduces the tag attack and garment tearing by shoplifters. The pin is smooth and will not damage threads like grooved pins do. No need to tag garments through seams. Faster application and removal. Attach tags in a visible position.

### Pin Park

No need to separate the tag and pin when in storage. We provide a special hole to temporarily park the pin on the tag when it is not on a garment. Faster reapplication, no lost pins and no fingers being pierced. Pin parking ensures no pins are left on sold garments that can injure your customers.

### RFID Compatible

RFID compatible when used with our optional RFID pin. EAS and RFID in one tag. Future proof tag – RFID ready.

### Lanyard Compatible

We built in a cable lanyard slot that allows you to attach this tag to the other merchandise like handbags, shoes and appliances.

### Ink Pin

Visual and actual security can be upgraded with our optional Ink Pin.

### Size

Vitag X30 is only 63mm long. Huge feature for a small tag.

### Colour

Black and light Grey
