Colour and Frequency	Reference
• Black - AM 58 kHz	VTI-011 58BS

Add-ons

• Superlock Detacher	VTDT4021
----------------------	----------

Ink Feature

Small and ultra-light, the Mini Shell Ink Security Tag comes with the added feature of a highly visible external ink ampoule for maximum benefit denial and security. This security creates the perfect visual barrier to theft as ink is a well-known deterrent to shoplifters.

Durable

The ink is housed in a clear yet very durable ABS plastic shell. No need to worry about ink damaging garments in day to day use as ink will only leak if considerable force is applied to open the tag without a detacher*.

Frequency

The Mini Ink Shell tag comes with inbuilt AM electronics, so you can upgrade and install a complete alarming AM security at any stage.

Lock

Superlock Detacher is a powerful magnetic detacher. If you are unsure if your existing detacher will open this tag, give us a call or email us.
