

Sky-Guard Installation Requirements

- Transmit Loop Cable
- Receiver Cable
- Receiver Unit

58Khz Sky-Guard System III (8ft x 15ft) WG SKG58-3

Minimum Requirements

- Access panels must be provided for control pack & receivers for servicing.
- Cabling around doorway can be encased in ducting or specifically made timber column (not metal).
- Control Pack must be within 1 metre of doorway approximately at floor level.
- Double power point required at control pack location on a dedicated circuit.
- 25mm Conduit must be installed in floor.

Minimum Requirements

- NO METAL to encase loop cable or receivers in or around doorway.
- Control Pack must not be located in ceiling height above 3 metres due to OH&S.

Other

- Please note that the above information is only a guide.
- If doorway configuration falls outside the above guidelines, the Technical Department must be consulted.
