

Skyguard

The innovative 58Khz Sky Guard system offers unique features that provide effective and discrete security, Sky Guard does not need a large antenna base installed in the floor to detect hard tags or labels. Sky Guard has no obtrusive side panels or pedestals; the system is installed inside or around the door frame or mall entrance walls for different size exit openings.

Doorway

Maximum Standard
Door Dimensions
2.5m (w) x 3.0m (h)
(with super pencil tag)

Electro-Mechanical

Dimensions: (HxWxD)
Controller: 535mm x
138mm x 70mm
