

CT200

Tablet Frame
CTK1M001
CTK1L001

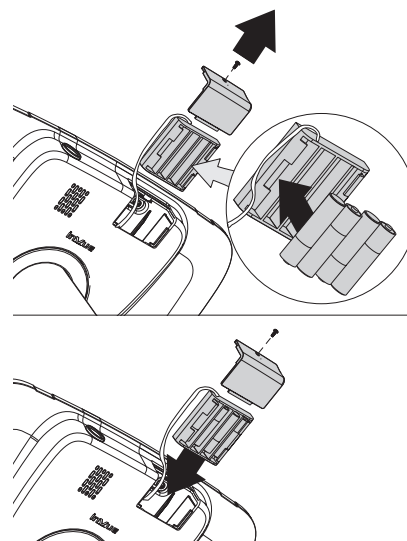

For Pedestal and Tilt Mounts Only:

- 1 Remove center frame ring by removing 4 screws from inside of frame as shown. Ring can be discarded or set aside for future use. (May be needed for other stand options)

For Battery Powered Lock Mechanism

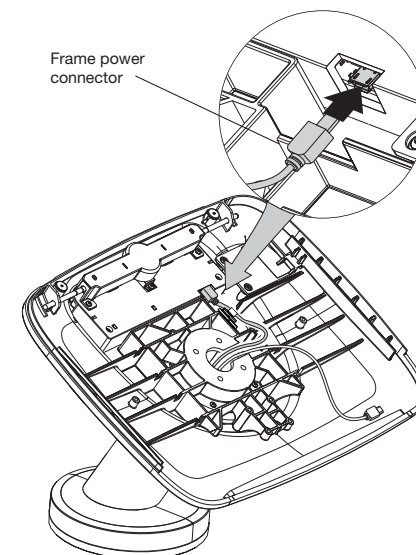

- 2a Remove screw and battery door on back of tablet frame and load four AAA batteries (included). Replace the battery door.

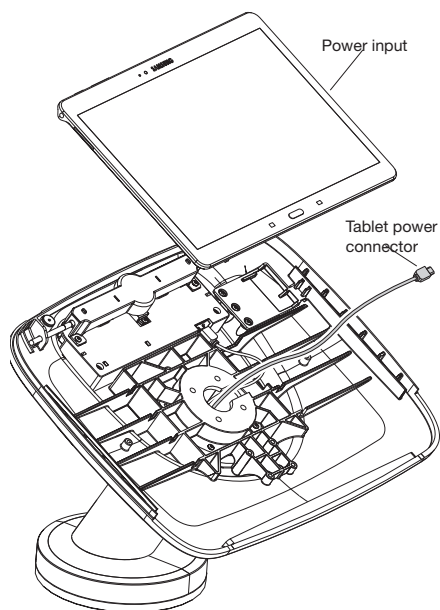

-Or-

For Wall Powered Lock Mechanism

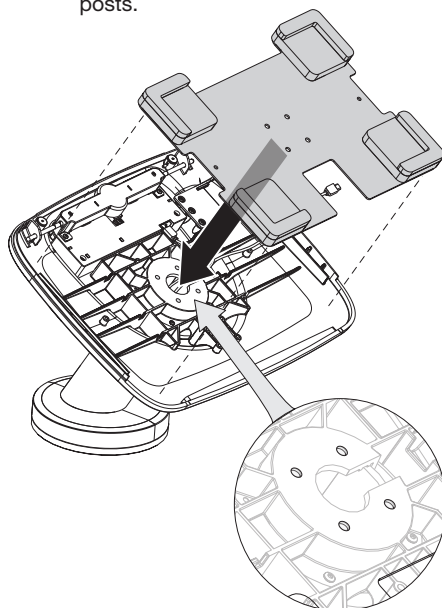

- 2b If using InVue 5V power supply, route power cord up and plug into connector at top of frame.

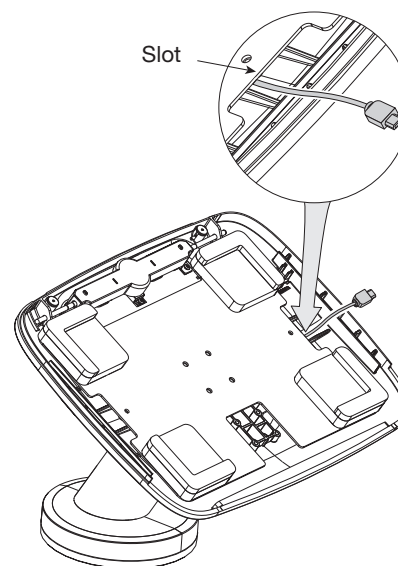

- 3 Route power cable to the right of the tablet frame. Use channels in tablet frame to ensure cable can reach power input location.

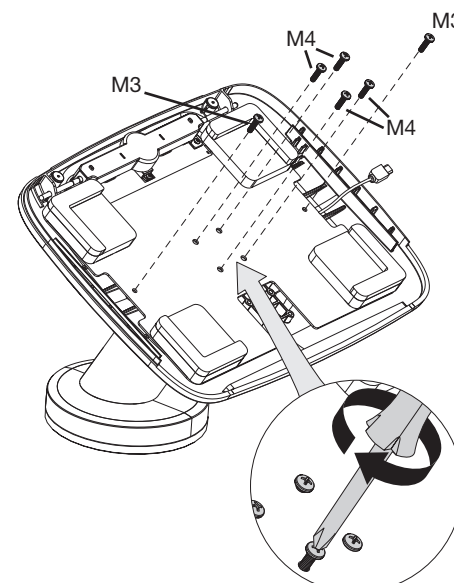

- 4 Place tablet insert into frame. Align the tablet insert frame with the four central mounting holes and frame posts.

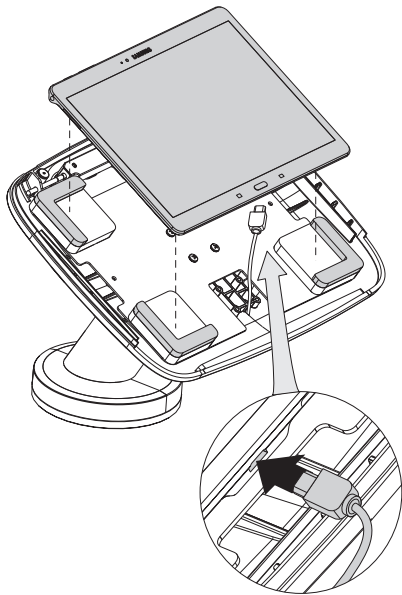

- 5 Power cables should come out of the slot in the tablet insert frame. Ensure power cables are not being pinched by the tablet insert frame.

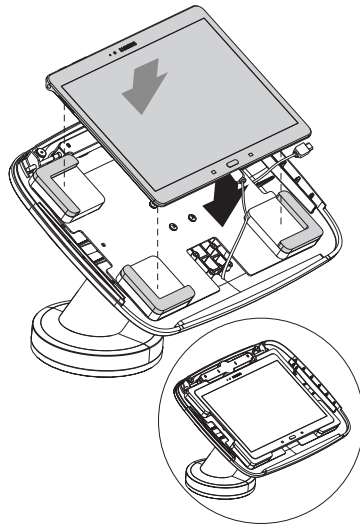

- 6 Secure tablet insert frame to stand using four M4 Phillips screws and two M3 Phillips screws provided.

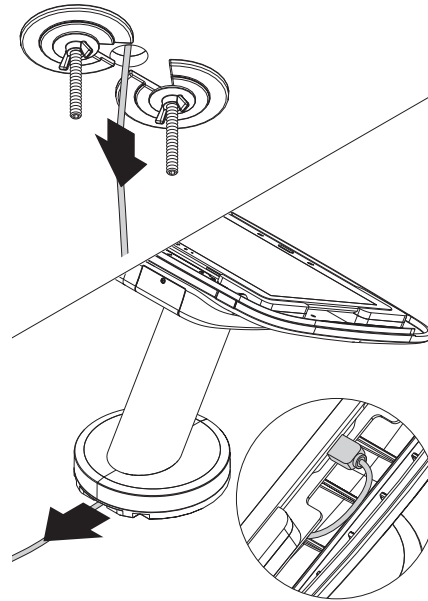

- 7 Plug tablet power cable into tablet.

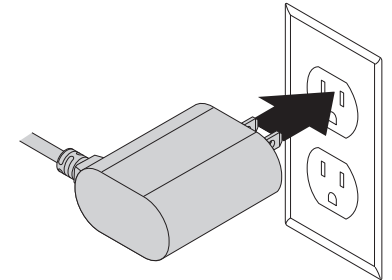

- 8 Push tablet into insert, ensuring tablet is captured by foam corners. Push out foam corners for tablet to fit.
NOTE: DO NOT PLACE COVER ONTO FRAME YET.

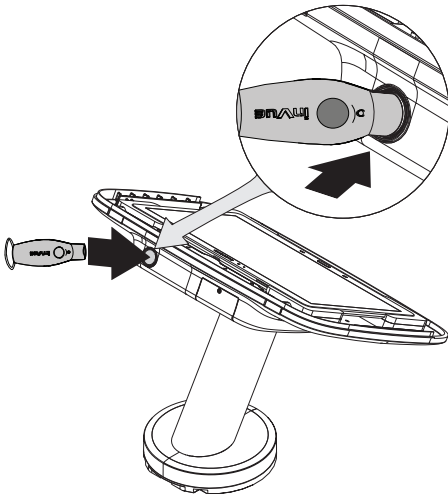

- 9 From below/rear of stand, pull slack out of power cable. Tuck excess wire out of the way inside of the frame as shown.

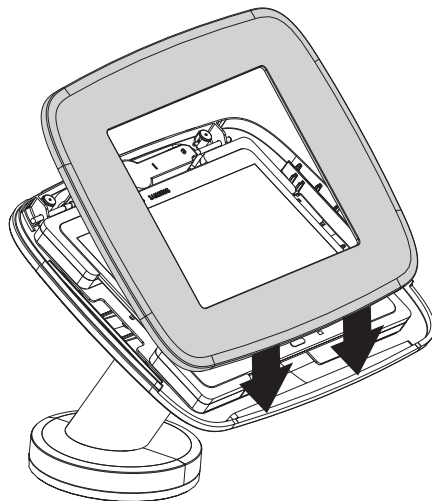

- 10 Plug tablet power cable into wall, check to see if tablet is receiving power.

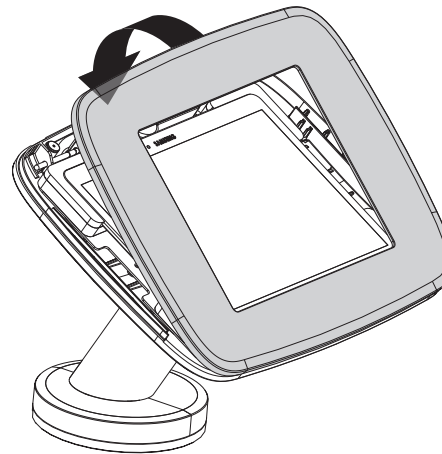

- 11 Follow instructions for InVue IR Keys to prepare key for store code transfer. Place key to IR lens on top of tablet frame and press button. An audible “beep” confirms that the mechanism has been coded.

- 12 Insert tab along bottom edge of tablet cover into opening at the bottom edge of the frame. **Note: tablet cover and insert are matched pair.**

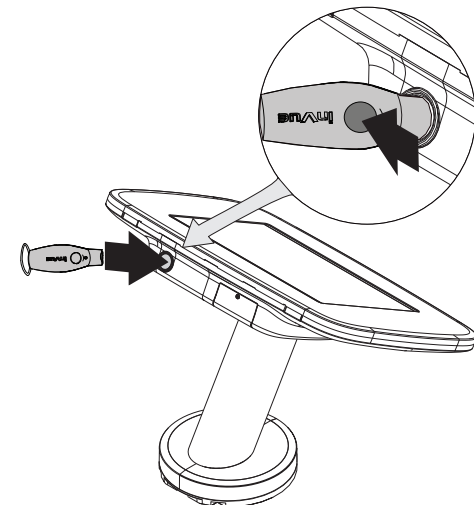

- 13 Pivot cover forward and push cover on to frame to lock in place. An audible “beep” indicates that the frame is locked.

Opening Frame:

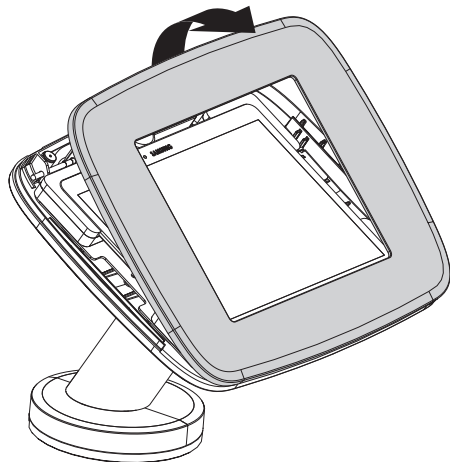

- 1 Place InVue IR Key to IR lens and press button. An audible “beep” indicates that the frame is unlocked.

Note: CT Key shown, frame operates with any programmed InVue IR Key.

2

Pull top edge of frame cover forward and remove it from the frame. **Note:** cover will relock automatically in 10 seconds if cover is not removed.
