

# BABY FORMULA PROTECTION

 Security: Standard     Detection Range: High

Prevent your baby formula tins being stolen in your stores. We offer a couple of options to protect baby formula, which will accommodate most tin sizes.

## Can security grip

AM and RF EAS Frequencies

- 4 steel cables are wound up inside of the round plastic housing which can be uncoiled and locked in place to fit around the tin.
- Locks onto top and bottom of tin.
- Tough, reusable and secure.
- Only opened with a compatible detacher.
- Alarms if cable is cut.

## Can wrap

AM and RF EAS Frequencies

- Compatible with the popular 127 diameter baby formula tins.
- Clamps around the bottom of the can and has little impact on shelf space.
- Only opened with a compatible detacher.
- Does not cover product information or manufacturing date.
