

BOSSINK Pin

Powerful Benefit Denial.
Built for BossTags,
Compatible with More Tags.

 **Security: High**  **Benefit Denial: High**

What is a Benefit Denial Pin?

A Benefit Denial pin is a smart loss prevention solution that removes the incentive to steal by damaging the item if forcibly removed. The BossInk Pin does exactly that—when tampered with, it releases a powerful, indelible ink, rendering the product unsellable and unusable.

Why Benefit Denial Matters

Professional shoplifters know how to bypass basic tags. The BossInk Pin levels up your store's defence by combining strong physical security with psychological deterrence. If a tag is forcibly removed without a detacher, ink is released—marking the item, discouraging theft, and protecting your bottom line.

Available in transparent and black

The Smarter Pin Choice

Whether you're using BossTags or other security tags, BossInk is a simple pin swap with serious impact. Deter theft, reduce risk, and upgrade your store's defences—without changing your tagging system.

Compatible with a wide range of existing tags.

The BossInk Pin is designed for seamless integration across a broad range of existing tag systems, making it the ideal upgrade for retailers who want enhanced security without the hassle of replacing their entire tagging setup. While it pairs perfectly with Vitag's XT30 BossTags, its universal pin design ensures compatibility with most standard tag housings used in retail today.
